

Robot Wars

(Ages 8-12)

In the city of Cyberville, robots helped with everything.

But two robots, Max and Juno, argued over who was smarter.

They started a "war" - who could solve the most puzzles?

They built towers, solved riddles, raced mazes.

In the end, they tied.

"We're both awesome!" Max said.

"Let's team up instead," Juno replied.

And they became the best inventor duo Cyberville had ever seen.
